As a precaution during the application of the pesticide, it is required for you to vacate your unit for 4 hours after the treatment is done. This must be followed strictly.

#### Preparation Sheet – Preventive Spray (General)

1. In all rooms, move the furniture away from the wall to provide enough space for the technician to move around.
2. In the kitchen, remove items from the drawers and cupboard and place them on top of the table, you may cover the items with plastic or sheets. Make sure all food containers are covered with lids and sealed to avoid contamination.
3. All pets must be removed from the premises.
4. Place all toys in a plastic bag or covered boxes.
5. Do not place items on beds, sofas and/or chairs.
6. Place all valuables in a safe and locked area.
7. Unplug all appliances outlets.
8. Make sure that the house is clutter free to give way for the technician to move around.

#### **NOTE:**

1. For a successful result from the treatment please follow the above instructions. Do not wash off or wipe off any chemical residue for a minimum of 2 weeks (behind the fridge, stove or under the sink). Vacuum regularly and ensure that proper sanitation is done for a successful treatment. Any visible residue can be wiped or mopped off.
2. If you have any question regarding the preparation, please call us on the number stated above.

**Reminder:** For pregnant women, babies, with allergies, illnesses or other unusual circumstances, it is advisable to stay away from the premises longer than as stated above.
