As a precaution during the application of the pesticide, it is required for you to vacate your unit for 4 hours after the treatment is done. This must be followed strictly.

Preparation Sheet – Preventive Spray (Bedbugs) 3 Sprays with 7-10 days' interval each spray.

1. In the bedroom – Remove all the clothes from the drawer and place them in a bag. Remove all bed linens. Do not place anything on top of the bed.
2. In the living room – Move the furniture away from the wall to create enough space for the technician to move around. Unplug all appliances outlets.
3. All toys must be in a bag or box to prevent them from being sprayed.
4. Pets must be out of the premises during the spray.
5. Vacuum the carpeted area and make sure that all rooms are cluttered free.
6. Place all valuable items on a safe and locked area.

NOTE:

1. For a successful result from the treatment please follow the above instructions. Do not wash off or wipe off any chemical residue for a minimum of 2 weeks (behind the fridge, stove and under the sink). Vacuum regularly and ensure that proper sanitation is done for a successful treatment.
2. If you have any question regarding the preparation, please call us on the number stated above.

Reminder: For pregnant women, babies, with allergies, illnesses or other unusual circumstances, it is advisable to stay away from the premises longer than as stated above.

Dragnet – PCP # 24175
